

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

JAN 16 2014

OFFICE OF
AIR AND RADIATION

The Honorable Tom Cotton
U.S. House of Representatives
Washington, D.C. 20515

Dear Congressman Cotton:

Thank you for your letter of October 23, 2013, co-signed by 38 of your colleagues, to U.S. Environmental Protection Agency Administrator Gina McCarthy requesting that the EPA hold listening sessions in rural areas across the United States on reducing carbon pollution from existing power plants. The Administrator has asked that I respond on her behalf.

The EPA is working diligently to address carbon pollution from power plants. In June 2013, President Obama called on agencies across the federal government, including the EPA, to take action to cut carbon pollution to protect our country from the impacts of climate change, and to lead the world in this effort. His call included a directive for the EPA "to work expeditiously to complete carbon pollution standards for both new and existing power plants." Currently, there are no federal standards in place to reduce carbon pollution from the country's largest source. The President also directed the EPA to work with states, as they will play a central role in establishing and implementing standards for existing power plants, and, at the same time, with leaders in the power sector, labor leaders, non-governmental organizations, other experts, tribal officials, other stakeholders, and members of the public, on issues informing the design of carbon pollution standards for power plants.

As we consider guidelines for existing power plants, the EPA is engaged in vigorous and unprecedented outreach with the public, key stakeholders, and the states, including your state. The eleven listening sessions the EPA held throughout the country were attended by thousands of people, representing many states and a broad range of stakeholders, including many from rural areas. In addition, the EPA leadership and senior staff, in Washington, D.C. and in every one of our ten regional offices, have been meeting with industry leaders and CEOs from the coal, oil, and natural gas sectors; state, tribal, and local government officials from every region of the country, including your state; and environmental and public health groups, faith groups, labor groups, and others. Our meetings with state governments have encompassed leadership and staff from state environment departments, state energy departments and state public utility commissions. We are doing this because we want—and need—all available information about what is important to each state and stakeholder. We know that guidelines require flexibility and sensitivity to state and regional differences.

To this end, we welcome feedback and ideas from you as well as your constituents about how the EPA should develop and implement carbon pollution guidelines for existing power plants under the Clean Air Act. Interested stakeholders can send their thoughts through email at carbonpollutioninput@epa.gov. Stakeholders can also learn more about what we are doing at www.epa.gov/carbonpollutionstandard. I welcome you to provide a link to our website from yours, and to share any other information about the EPA's public engagement activities with the citizens of your state.

Please note that the public meetings we've been holding to date and other outreach efforts are happening well before we propose guidelines. When we issue the draft guidelines in June 2014, a more formal public comment period will follow, as with all rules, and more opportunities for public hearings and stakeholder outreach and engagement. I look forward to hearing what you think about the draft guidelines at that time, too.

Again, thank you for your letter. If you have further questions, please contact me or your staff may contact Josh Lewis in the EPA's Office of Congressional and Intergovernmental Relations at lewis.josh@epa.gov or (202) 564-2095.

Sincerely,

A handwritten signature in black ink, appearing to read "Janet G. McCabe".

Janet G. McCabe
Acting Assistant Administrator
